

DO YOU HAVE **COPD?**

If so, perhaps you can join the TRITON Study and possibly help find better treatment options for future sufferers of COPD.

Study participation is at no charge, and compensation for time and travel expenses may be available to those who satisfy applicable requirements.

To join the TRITON Study, potential participants must:

- Be a current or ex-smoker at least 40 years of age
- Have been diagnosed with COPD for at least one year
- Require daily medication to control their COPD symptoms

**TRITON**

Other requirements may apply.

To learn more about the TRITON Study, a medical research study of an investigational medication for those who suffer from COPD, please contact us today.
