

# Do you have idiopathic hypersomnia?

## Consider the INTUNE study.

### Now enrolling: the INTUNE study for adults with idiopathic hypersomnia (IH)

The INTUNE study is looking for participants with IH. Study doctors are testing the safety and efficacy of an investigational study drug, pitolisant (given as a tablet), for excessive daytime sleepiness and other symptoms in adults with IH.

To be eligible for this study, you must be:

- 18 years of age or older
- Diagnosed with IH
- Able to understand and sign a consent form

This is not a complete list of study requirements. The study doctor will review all the study requirements with you.

Ask your doctor if you are eligible for this study.
